* The set-up procedure and the setting names may differ depending on the OS and/or OS version of your device.

* The images in the manuals are from the English version of the operating system.

* Contact the service provider in the event you need to: - Reset your device to its previous state (as it was before using Japan Travel SIM), or - Swap to a third-party's SIM card.

APN Settings for iOS

If you cannot set APN manually:

1. Use Safari to download the APN configuration profile from the link below.

* The APN configuration profile has been created by us. Please note that we are not responsible for guaranteeing anything regarding its use.

* Your device may behave unexpectedly depending on the iOS version.

2. Tap [Install], and then [Install Now].

APN Settings for Android
